DESCRIPTION

410 is a quality 10" Super VGA monitor packaged in a 10.5" (6U) high rackmount chassis.

The 410 is fan cooled to extend the life of the monitor. Intake air is filtered and the chassis operates at positive pressure to limit dust infiltration. A plastic window protects the CRT face.

Front panel controls include power switch, brightness, contrast, vertical height, vertical position and horizontal position. An LED indicates power is on.

Monitor will operate in non-interlaced modes of 640x480, 720x350, 720x400 and 800x600 pixels. The 1024x768 mode is interlaced.

See Page 39 for slides.

410 Monitor shown with 590 chassis & 605 keyboard.
